

## ER26500H

**SPECIFICATION:** (23±2°C)

Nominal capacity (3mA~2V):	8.5Ah
Rated voltage:	3.6 V
Max constant current of discharge:	130mA
Max discharge current(pulse):	400mA
Weight:	53g
Operating temperature range:	-55~85°C

**Discharge characteristics at 23±2°C**

S: Standard termination

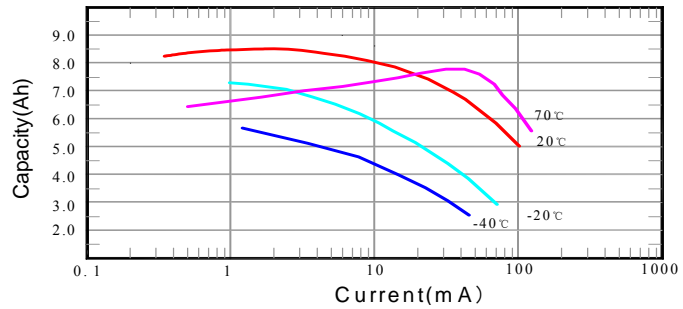

**Notes:**

- Dimension: mm
- Special terminations can be made as requested.
- T: Solder tabs
- P: Axial pins

**Important Notes**

- Do not short or charge the battery.
- Over-discharging, crushing, incinerating, and disassembling the battery are prohibited.
- Do not heat/use the battery beyond the permitted temperature range.

**Capacity VS. Current**

**Voltage VS. Temperature**
